

WELCOME TO THE HOME OF **AFTERMARKET**

50 years of core competence in the
field of automotive spare parts.

**UPDATE
2026**

Editorial

Guido Berkefeld
Managing Director

MOIN [mɔɪn] a typical North German way of saying hello

Over 50 years of Jürgen Liebis ch GmbH. Over this time, we have continuously expanded our knowledge of the market so that we can not only serve our customers competently, but also with excellence. By doing so, we have built up a considerable international network of customers, suppliers and service providers.

Since 2004, we have been providing a comprehensive range of great value automotive spare parts under our own AIC Germany brand. In this way, we ensure that even those vehicles for which a repair with original parts would often not make sense due to cost reasons remain operational.

Performance-oriented

Our approach is based on understanding needs and requirements. What direction are the markets developing in? Are individual components specifically needed in order to conduct repairs in accordance with the current value of the vehicle? Or is a smart complete solution better suited?

AIC Germany currently lists over 13,500 items in its product range, thereby catering to the widest demands for spare parts of vehicles – no matter if with internal combustion engines or electric motors. We believe it is important to find targeted solutions for the aftermarket in order to meet the requirements of our customers.

Reliable

We believe that a trustful and sincere business relationship is as much about good stock management as it is about reliable and fast delivery. What we have on offer, we also deliver as quickly as possible. And this is not merely an empty promise. It is backed up by a delivery capability of over 90% and high delivery rates. An effective combination of teamwork and automation in our warehouse enables us to achieve short throughput times for incoming orders and fast delivery to our customers. Our sales team is a reliable point of contact for ensuring successful cooperation and maximum flexibility in all customer requirements.

We are at your service!

Your AIC Germany-Team

Welcome to the home of aftermarket

Five decades of success

Founded in 1975 as a two-man business in the middle of Hamburg, the Jürgen Liebis GmbH has grown into a successful, medium-sized company for the independent automotive spare parts market. With our many years of experience in the market, we are a globally recognised supplier of high-quality spare parts. Our business activities are always guided by the proven Hanseatic virtues. From Hamburg to all corners of the world - reliable, down-to-earth and authentic.

Modern logistics for maximum efficiency

Today, we operate from our state-of-the-art logistics centre in Glinde. Several thousand automotive spare parts are handled daily in our dynamic warehouse system. With the introduction of an automated small parts warehouse (AS/RS) in 2019, we can ensure fast and efficient picking of our parts with the help of 42 robots.

Core competence meets quality

With our broad product portfolio in over 100 product groups and more than 13,500 articles, we create solutions for the independent aftermarket. Our top priority is and remains the combination of high-quality products and fair prices, so that even older vehicles remain operational.

Flexibility and market awareness

It is important to us to respond flexibly to the needs of the market and our customers and to identify new trends at an early stage. In doing so, we benefit from the partnership-based cooperation with our international supplier and customer network.

Quality as the foundation of our success

The success of our company is based not least on the high quality of our products and our high standard of service. Quality and safety in all areas are our top priorities, from the expertise of our employees to our work processes and the maintenance of various partnerships with original equipment manufacturers such as iwis, Dunlop Suspension Systems and Olsa. All this is supported by our sophisticated and TÜV approved quality management system. We do everything we can to offer our customers a high-quality and suitable solution for the aftermarket as well.

Quality is the **be-all** and **end-all**

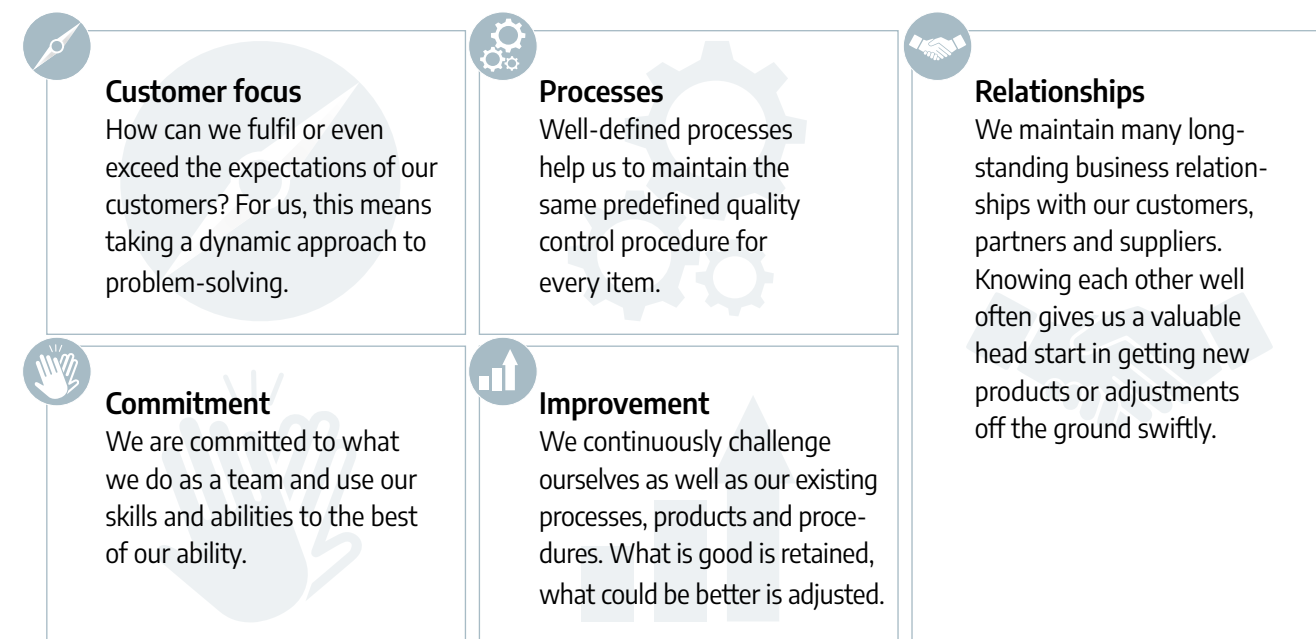

Strong brands for strong performance

Variety and quality combined

The brand world of Jürgen Liebisch GmbH brings together proven quality and a wide product range. In addition to the in-house brand Original AIC Quality, the portfolio includes OE replacement parts and trusted brands like iwis, Olsa, and dunlop.

AIC Germany stands for customer focus, efficient processes, strong relationships, dedicated partners, and continuous improvement – delivering reliable, long-lasting quality.

WAREHOUSE

Using state-of-the-art technology and a highly motivated team, several thousand vehicle spare parts are moved through our central warehouse every day. We are constantly investing in technical innovations and the continued professional development of our employees to ensure that we can maintain the service that our customers value so highly as we continue to grow.

Innovation and teamwork

Man and machine – Our logistics edge

In our parcel shipping area, we dispatch hundreds of parcels every day, supported efficiently by our packing machine. During picking and packing, we ensure product quality and correct order fulfilment in all processes by applying the four-eyes principle.

Recently, our warehouse team of nearly 70 employees has been joined by “Robbie”, our first autonomous warehouse robot. He supports all routine tasks wherever possible and has become a valuable daily assistant in our warehouse.

When it comes to packing, we are fast, efficient and resource-friendly. Our packing machine provides us with a made-to-measure, neutral box for every parcel consignment. Our team is supported by ‘Robbie’, our autonomous warehouse robot that takes care of routine tasks automatically.

Shaping the market for five decades

What makes us proud:

Our customer base is constantly expanding – and we have maintained business relationships with most of our customers for decades already. Our customers especially value our strong flexibility in handling individual requests and requirements, as well as our extensive expertise in the aftermarket. We consistently follow our guiding principle: “first to customer” – the commitment to always offer the right solution for our customers.

50

1994

Import of OE vehicle parts to Germany for all European car brands.

2016

Relocation of the company headquarters to the new distribution centre in Glinde, near Hamburg.

2020

With the collaboration with iwis, an OEM brand is distributed by AIC Germany for the first time. The Dunlop Suspension Systems and OLSAParts brands follow shortly afterwards.

2023

Introduction of driverless transport systems for the internal transport of incoming goods.

To be continued ...

1975

Establishment of Jürgen Liebsch GmbH.

2004

Launch of our own brand AIC Germany.

2019

Membership of ATR, expansion of the distribution centre by more than double the area, acquisition of a fully automated mini-load warehouse.

2022

Our team continues to grow and consists of over 100 employees.

2025

We celebrate 50 years of expertise in automotive spare parts with over 100 colleagues.

Repair kits

A clever idea!

smartKITs save time and effort

Our smartKITs were specially developed to make work easier for workshops. The advantage of the pre-assembled components begins directly in the ordering process: With a single click, all required parts can be ordered in the set article number. No more time-consuming and individual searches for the right individual items.

PARTS KIT, AUTOMATIC TRANSMISSION OIL CHANGE

AIC item no.: 74779Set
OE ref no.: 246 377 0495

* Discover all items
in this product group

STEERING KNUCKLE SET

AIC item no.: 75796Set
OE ref no.: 1J0 407 255AH

* Discover all items
in this product group

Modern vehicles with DSG, automatic, or CVT transmissions require regular maintenance to ensure optimal performance and longevity. An AIC Germany smartKIT provides all the necessary components for an efficient and professional transmission fluid change.

BENEFITS:

Complete solution: Contains all necessary components such as transmission fluid, seals, filters, and bolts.

Manufacturer-compliant quality: The kits comply with OEM specifications and protect the vehicle warranty.

Easy application: Perfectly tailored to all common vehicle models to simplify the maintenance process.

A steering knuckle kit is the ideal solution for a quick, safe, and cost-effective chassis repair. By providing a complete set of all relevant components, workshops save time and money and can offer customers a long-lasting and safe repair.

ADVANTAGES:

Time savings in the workshop: All relevant parts are included in the set and some are even preassembled, eliminating the need for time-consuming individual procurement. This significantly reduces labor requirements.

Easier assembly: Precisely fitting parts simplify installation and reduce the risk of assembly errors.

Durability and safety: All included components are manufactured to a high standard and ensure optimal driving stability and safety.

Pure aftermarket!

More than standard

Niche power for pros

AIC Germany is not only specialized in common automotive spare parts, but also in rare niche products. Its product range surprises with a wide variety of spare parts at a fraction of the cost of original OE spare parts.

Particularly exciting:

Many of these products are still relatively unknown in the aftermarket. Only a few are aware that, in addition to well-known OE replacement parts, there are also specialized solutions for niche applications available.

Cover, cargo space

Whether as a lid or a roller blind – our cargo covers offer an affordable and high-quality solution for your vehicle's needs.

Holder, sun visor

There are some car parts that hardly anyone talks about. These little brackets are certainly among them. If they break and the sun visor dangles, the glare from the sun is not only unpleasant, but also dangerous. AIC Germany delivers on its promise and supplies suitable replacements.

Gear Shift Lever Knob

The gearshift gaiter, usually made of synthetic leather, can become cracked and porous over time. That doesn't really look good. When it's time for an exchange, AIC Germany has replacements available.

Tailgate handles

If the tailgate handle is causing problems, it sometimes helps to tap the release area lightly with your fist. However, this is by no means a permanent solution, and sooner or later, a replacement will be necessary. In this case, it's worth taking a look at the AIC product catalog.

Hose, fuel overflow

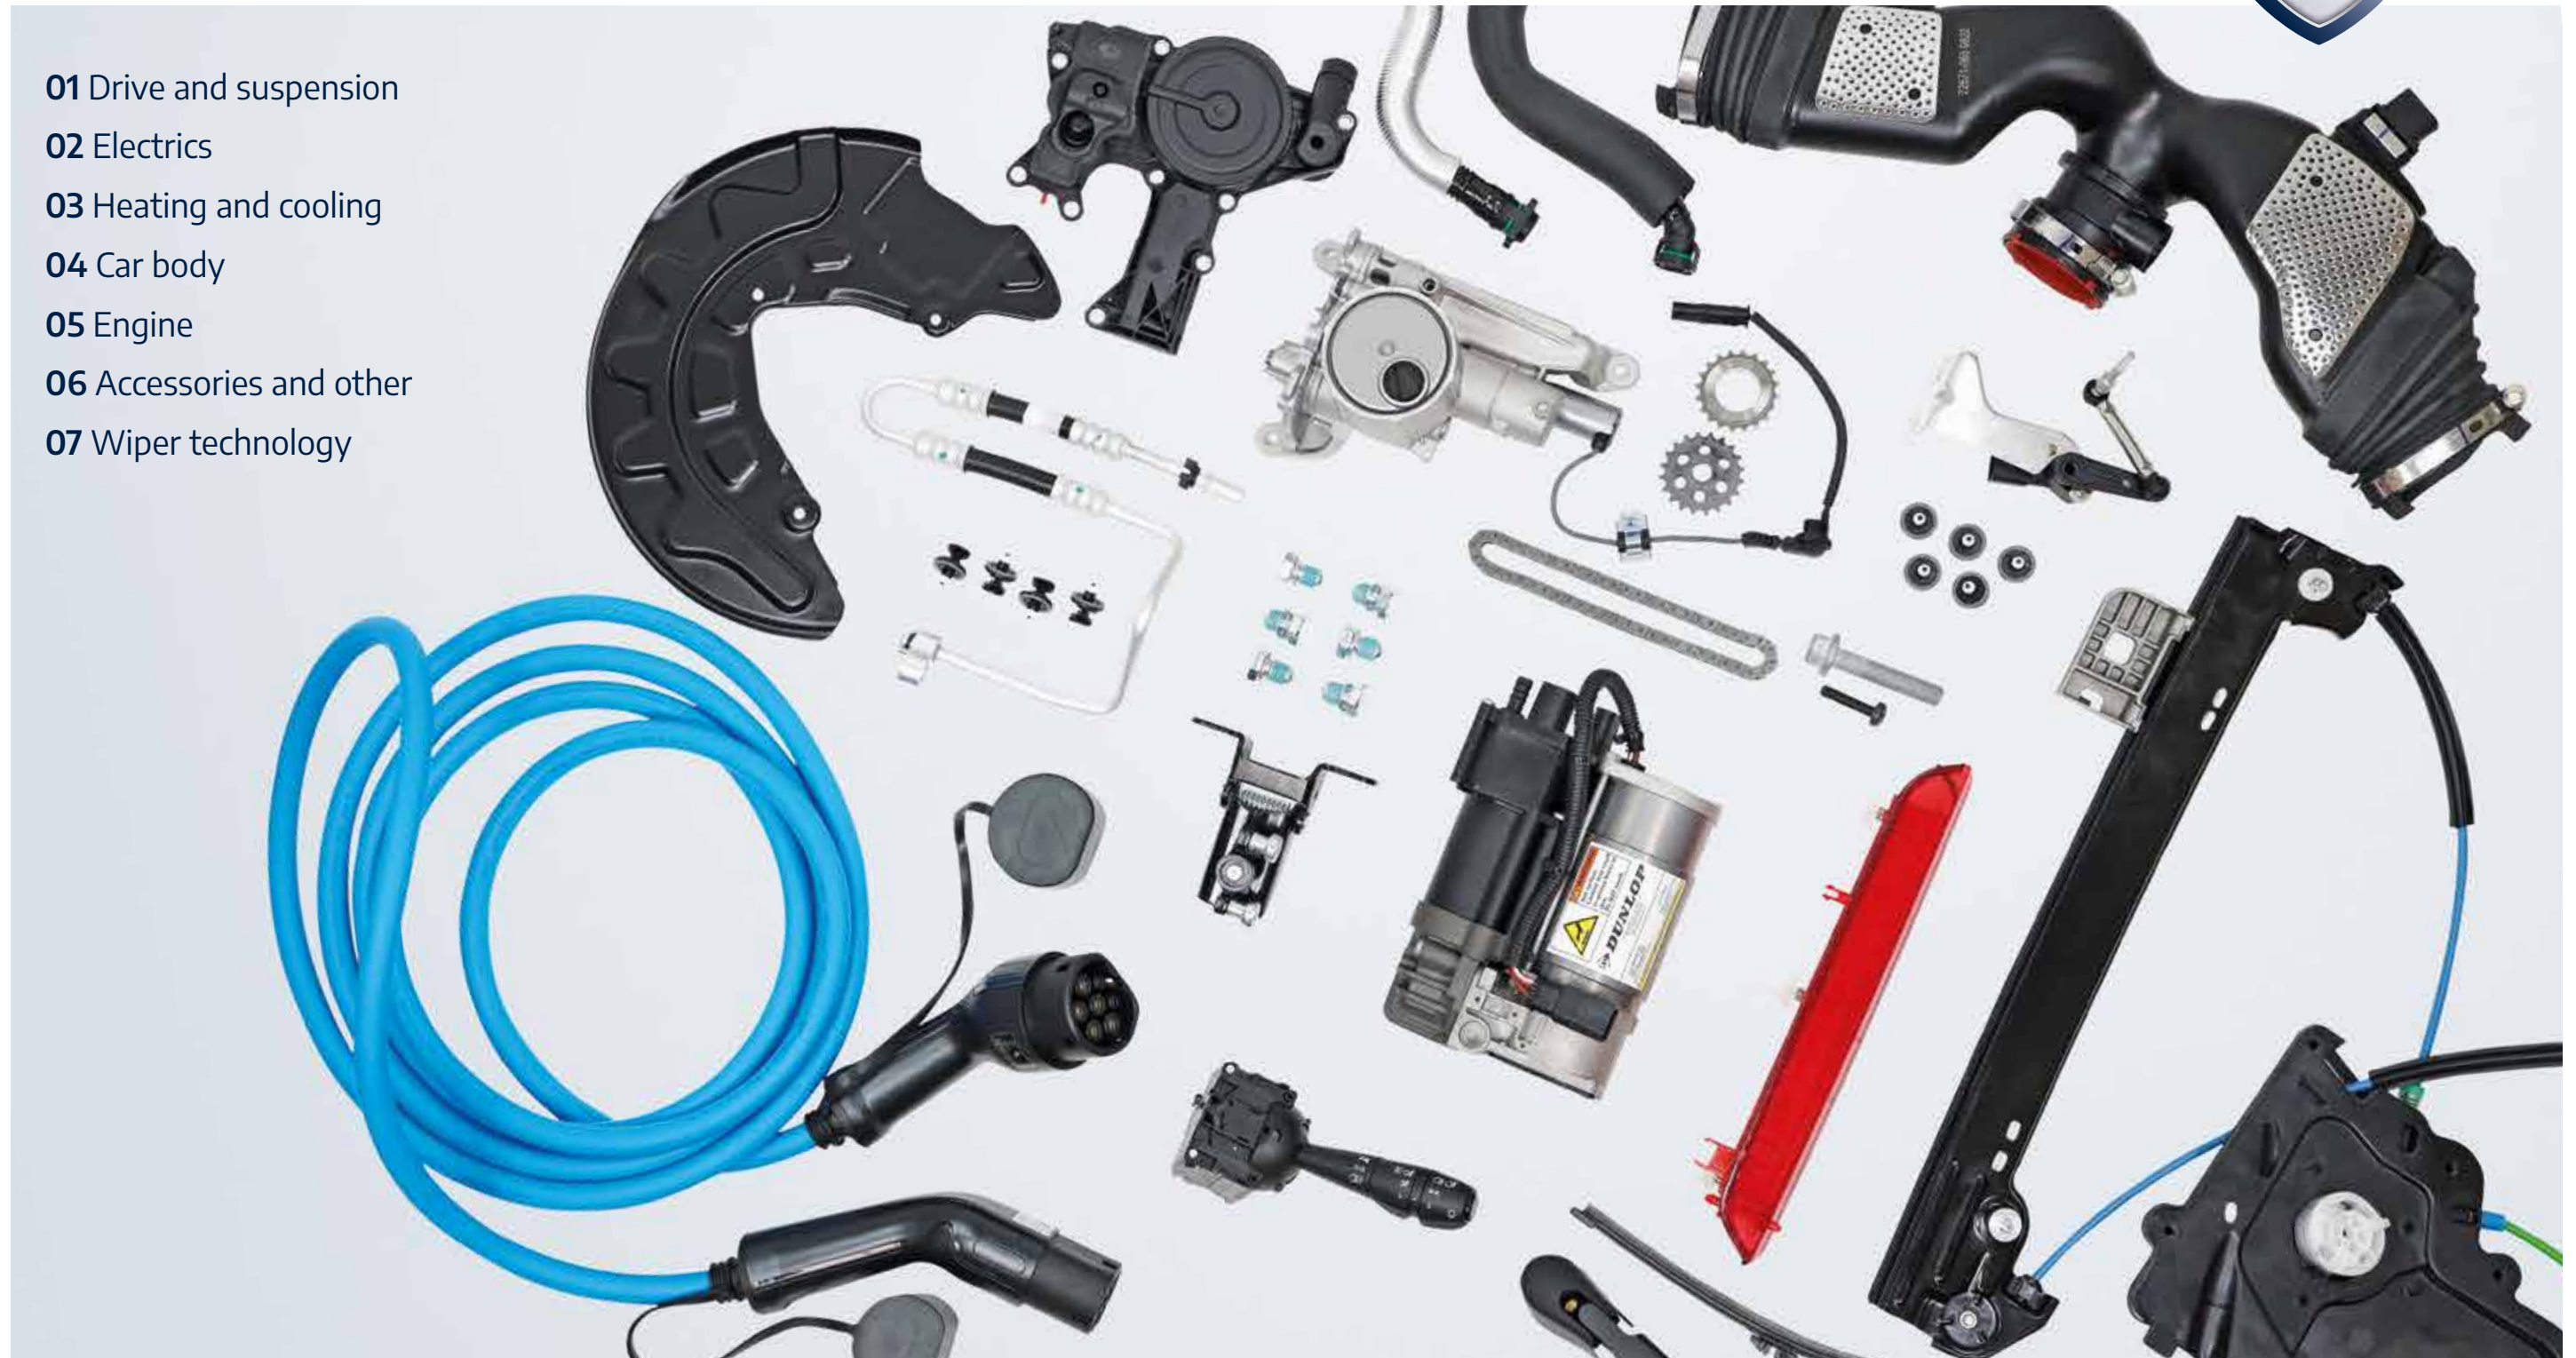

Fully functional, they work quietly and reliably to return excess diesel to the tank. Defects are immediately noticeable, unpleasant for the nose and the environment. AIC Germany is the port of call for replacement hoses, offering high-quality replacement parts at great value within its comprehensive range.

01

Drive and suspension

**Convincingly good**

Today's vehicles just keep getting heavier – a fact that puts a lot of stress on suspension components such as steering knuckles and wheel bearings. At AIC Germany, we recognised the market need for steering knuckles at an early stage. The initial niche product quickly developed into the best-seller in our range. Today we have a significant assortment in this area. There is also a wide selection of hydraulic hoses and wheel bearing sets at AIC Germany, and our portfolio is constantly being expanded.

Release bearings • Transmission parts • Hydraulic pumps • Hydraulic hoses • Wheel bearings • Steering knuckles • Wheel hubs • ABS rings • Dunlop air suspension • Shock absorbers • Suspension springs • Steering parts • Rubber-metal bearings • PUR items • Drive wheel, speedometer • Steering gear • Joint set • Axle tubes • Retaining clips, brakes • Brake/vacuum hoses • Splash guard, brake disc • Compressor, compressed air • Brake discs, drums • Brake pads/brakeshoes • Brake repair kit • Brake attachments • Vacuum pump, brake system • Selector rods, manual transmission • Cable pulls • Brake pad wear indicator • Valve, transmission

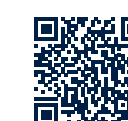

Steering knuckle, wheel suspension

Suitable for*: e.g. Audi A4, A6; Skoda Superb; VW Passat

Hydraulic Hose, steering system

AIC item no.: 57179
OE ref. no.: 1737 517

Suitable for*: Ford Fiesta and Fusion

Sluggish steering? Speed and expertise now matter

Sluggish steering is often a sure sign of a fault in the steering system. Leaking oil poses a considerable risk to driving on the roads and to the environment. A sudden loss of steering assistance can also quickly lead to a serious accident.

With our hydraulic hoses in OEM quality, qualified specialists can quickly rectify steering problems.

Steering Gear

AIC item no.: 75492
OE ref. no.: 6Q1 423 062BX

Suitable for*:

Suitable for*:
e.g. Opel Astra G; Mercedes Benz SLK; Nissan Qashqai

Item details

Auxiliary Stop Light

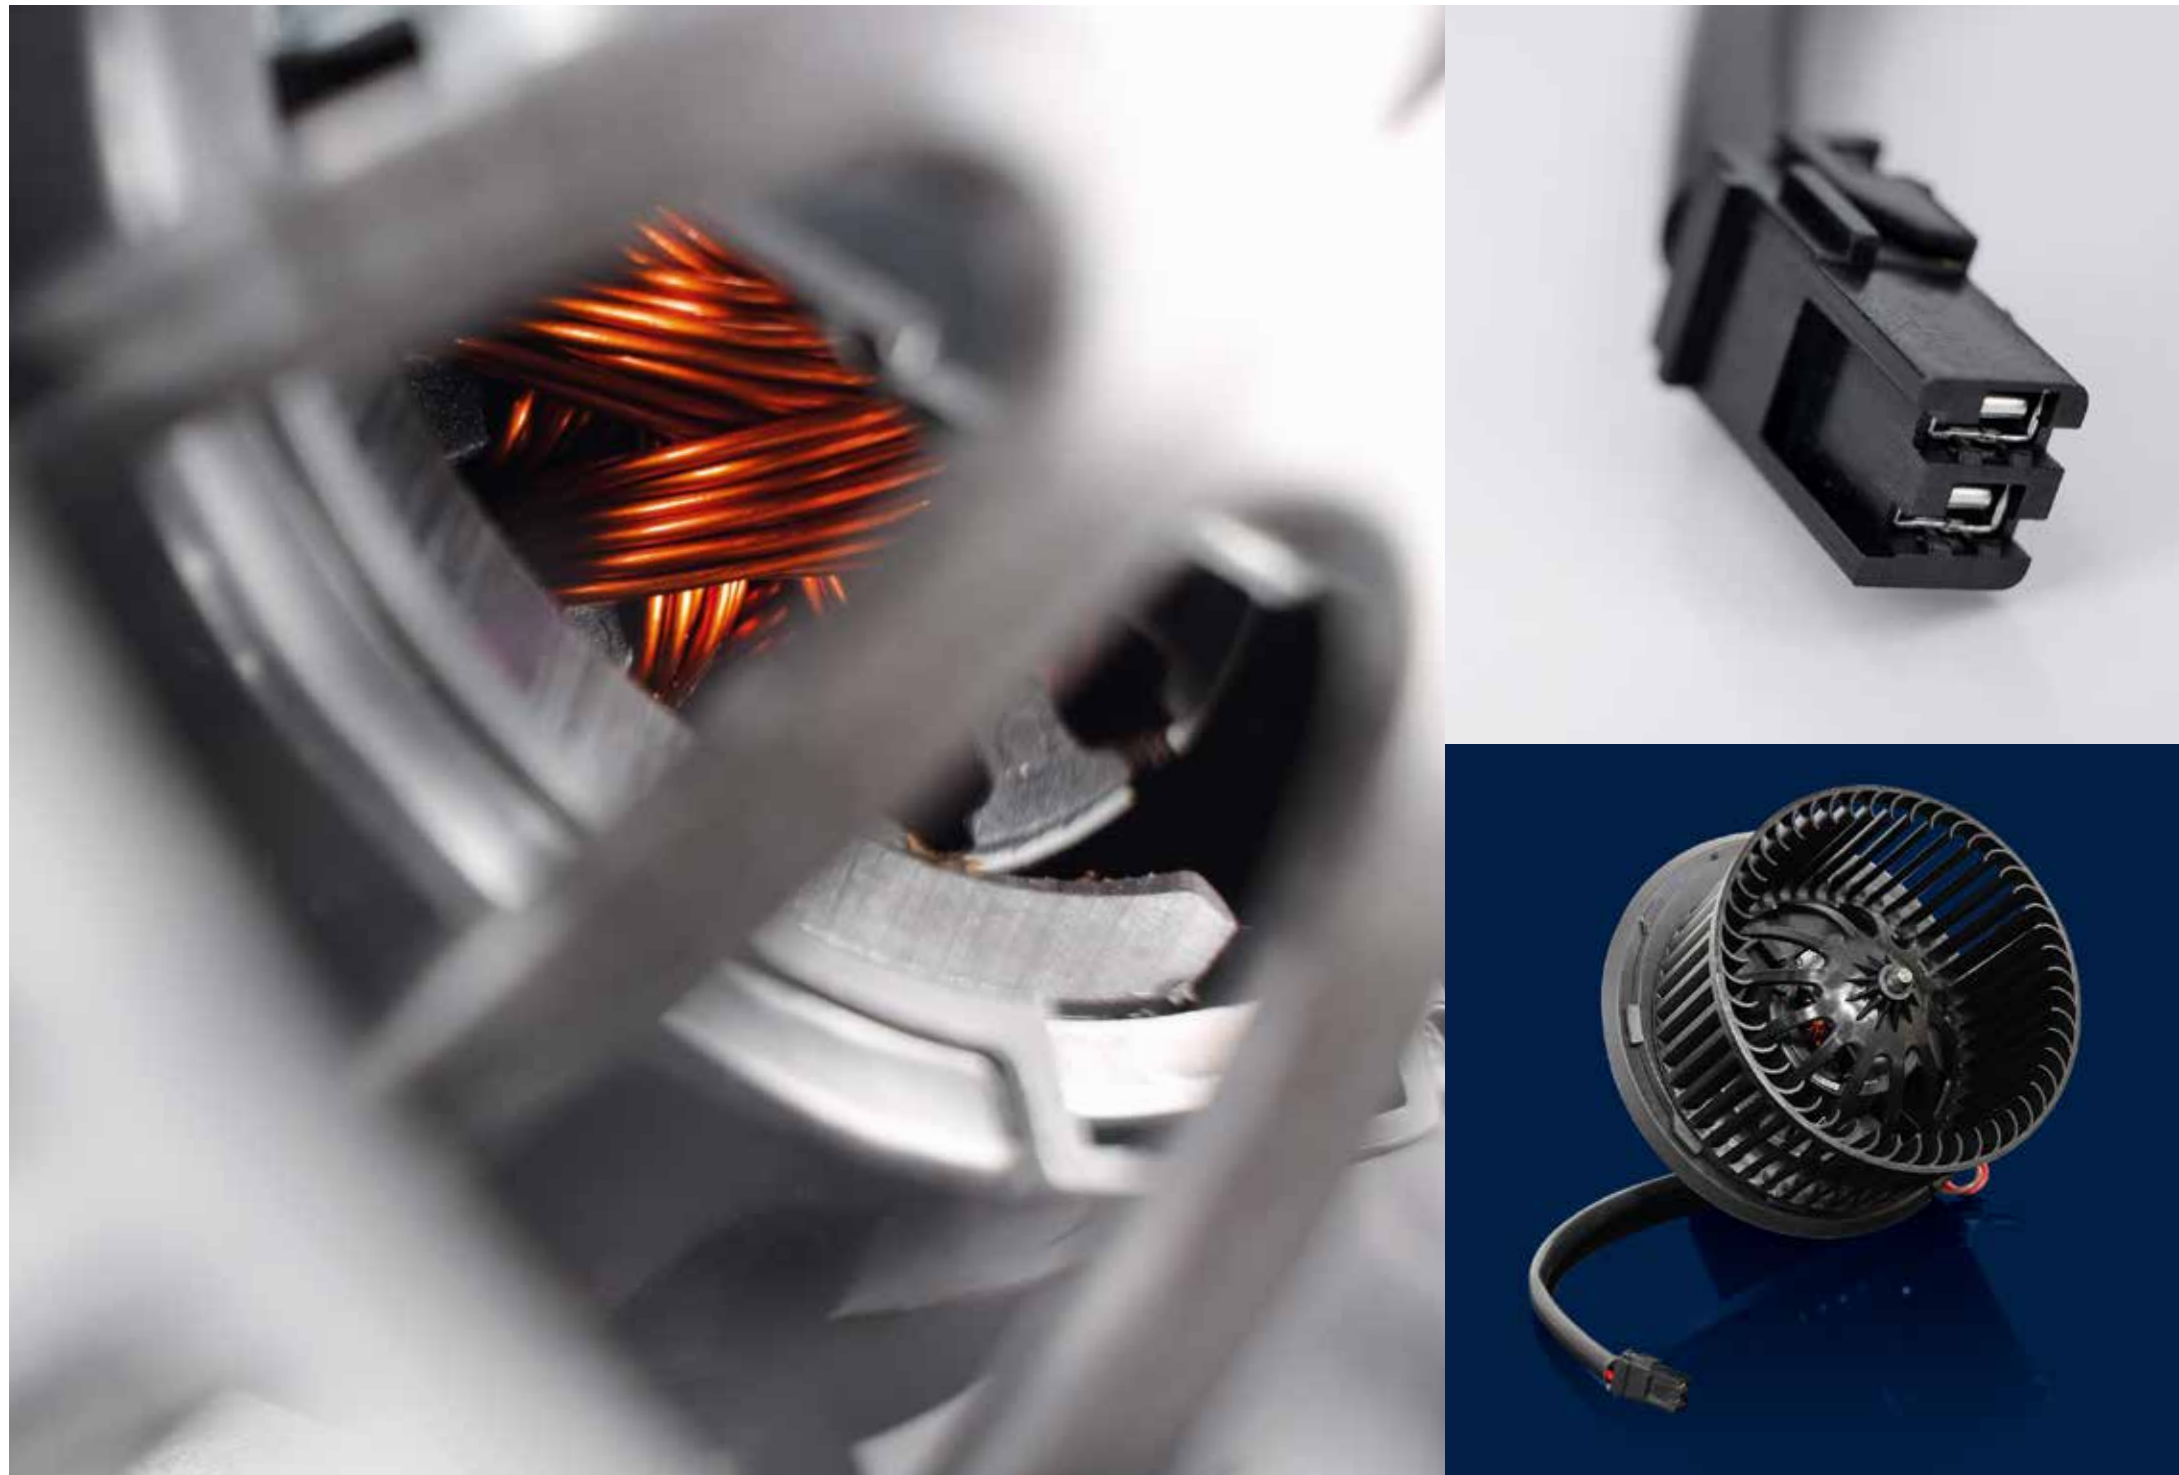

AIC item no.: 70403
OE ref. no.: 1U9 945 097B

Suitable for*: Skoda Octavia

03

Heating and cooling

**Comfort at the touch of a button**

Once considered a luxury, now mostly standard: Automatic climate control in the car. It regulates the interior temperature precisely and intelligently, in both summer and winter. As a result of this continuous usage and the vibrations in the engine compartment, air-conditioning lines in particular must withstand a great deal of wear and tear. It is not uncommon for them to leak and need replacing. In contrast to many OE suppliers, AIC Germany offers air-conditioning lines with seals for easy replacement.

Containers / tanks • Water pumps • Water flanges • Thermostats • Radiator hoses • Radiators • Heat exchangers • Blower motors • A/C parts • Series resistors • Electric fans • Fan clutch

Electric motor, interior blower

04

Car body

The small, subtle difference

A tailgate can be closed quietly or with a loud thud. The small but subtle difference is made by the tailgate's closing assistance mechanism. This convenient feature quietly pulls the tailgate into the latch. Furthermore, it also reduces the effort required, which is particularly beneficial when it comes to larger models such as vans. An example of a tailgate lock from the AIC range can be found on p. 32.

Pedals • Axles/ Aggregate carriers • Window regulators • Window-regulator cranks • Door handles • Bonnet handles • Gas spring • Repair plate • Locks, door latches • Central locking • OLSA mirror • Insulation mat, bonnet • Retaining straps • Lock cylinder • Steering wheel lock • Switch, interior

05

Engine

Runs like a well-oiled machine

Regular oil changes are an essential procedure to keep a vehicle running smoothly for the long term. This service alone accounts for a third of the revenue in garages and is therefore an absolute “standard service procedure”. Besides the oil, it is also important to change all the necessary seals and filters to ensure that the lubrication system continues to function reliably. The transmission also needs new oil regularly. The interval is specified by the manufacturer. Complete transmission oil change kits with German brand-name oil and necessary accessories are supplied by AIC Germany for garages.

Crankcaseventilation • Cylinderheadcover • Oil pan • Parts kit, oilchange • Cover, timingbelt • Tensionerpulley, tensioning-element • Camshaftadjuster • Pulley, crankshaft • Gear, crankshaft • Tappet • iwisenginepart • iwischainset • Secondaryairpump • Idle controlvalves • Throttlevalves • Engine attachments • Carburettor-flange • Fuel supply • Fuel tank • Funnel, oil dipstick • Oil pump • Oil cooler • Cover, oil filler neck • Oil filter, cover/housing • Valves for filters • Air hose • Intercooler • Oil line, supercharger • Lambda sensors • Air mass meter

New mobility parts

A fascinating future.

Electrified by what's new

Their numbers are increasing every day. Electric and hybrid vehicles are rapidly taking over the roads. Admittedly, not always as quickly as is the case in some of Europe's Nordic countries, where vehicles with internal combustion engines already play a lesser role. Nevertheless, the transition to electric vehicles is gaining momentum fast. This is why we at AIC Germany are dynamically adapting our range of spare parts to meet the needs of the market.

Charging cable, Type 2 electric vehicle charging plug

Timing chain systems

iwis mobility systems

iwis
wir bewegen die welt

iwis mobility systems, founded in 1916 by Johann Baptist Winklhofer, is a leading global supplier of high-performance drive chains, innovative chain drive systems, as well as robust and precision solutions for customer-specific applications of all kinds "Made in Germany". With their timing chain kits for original quality engine repair, iwis has created a solution to avoid the hassle of searching for all the individual parts. You have everything at hand with one click and additionally save time and money. The individual components are perfectly aligned to each other.

**MADE IN
GERMANY**

iwis
BROCHURE

Air suspension systems

Dunlop Suspension Systems

Dunlop Suspension Systems is the first and leading manufacturer in Europe to design, develop and produce complete original quality air suspension systems since 1950. At its purpose-built facility at Prologis Park in Coventry, England, components are not only designed and developed, but also tested in a sophisticated test procedure that simulates real-world environmental conditions. This ensures the quality and reliability of the components. A key feature of Dunlop's air suspension system is the "active system". No manual adjustment is necessary after installation. The air spring components are controlled and managed by the system. Quite simply with Plug&Play.

MADE IN EUROPE

Lighting components

OLSAParts

OLSAParts

OLSAParts has been a specialist in high-quality lighting components for cars and commercial vehicles for more than 70 years and is one of the most important automotive suppliers in the world. Olsa's headquarters are located in Rivoli (Turin), Italy. The qualified team of Olsa, consisting of more than 100 engineers, develops high-quality headlights, rear lights and small lights in OEM quality for well-known manufacturers and now also for the independent aftermarket.

MADE IN EUROPE

We sell real parts and serve with real contact persons

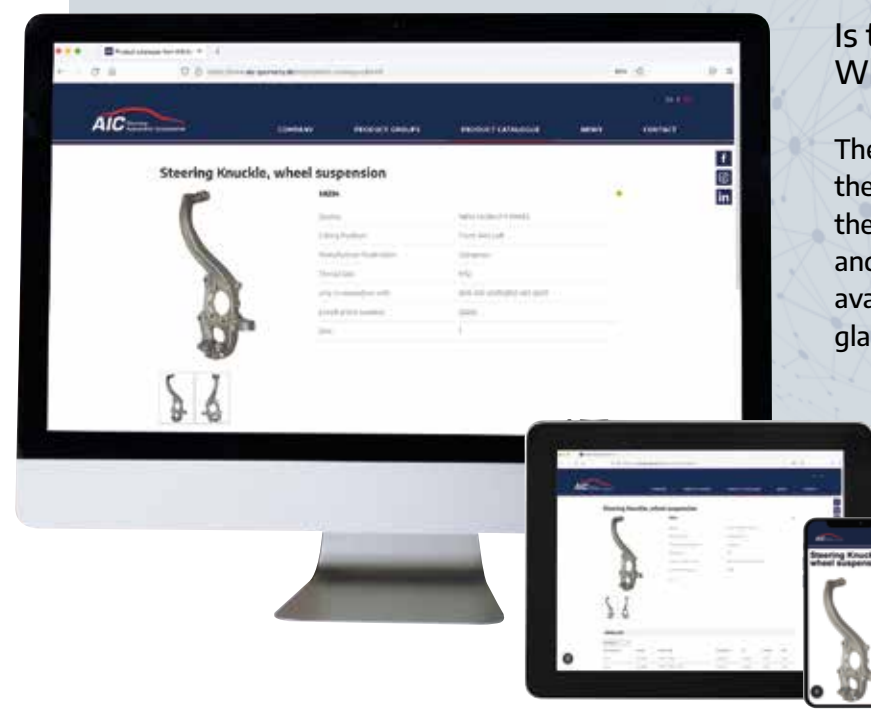

Everything under one roof –
with one central contact number.

+49 40 25 30 66-0
Mon-Fri from 8:00 am - 4:30 pm

contact@aic-germany.de

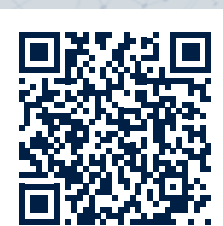

- » **For AIC Germany, service starts with accessibility:**
Who do you want to get in touch with?
- » **Service-oriented back office**
For order processing and delivery questions
- » **Competent technicians**
For technical queries and installation assistance
- » **Reliable sales department**
Your contact for sales and conditions

A single click and glance

Is the product available?
What is the packing unit?

The AIC digital product catalogue answers these two questions immediately, around the clock. One click on the desired article and the traffic light indicator shows the availability and the packing unit at a single glance.
